Maine Lakes	https://www.lakes.me/spring-2021-newsletter	Maine's lakes continue to be the standard for freshwater lakes in the U.S. (unfortunately, with a few exceptions), and they continue to be recognized as superb places to recreate and live; and are recognized as economic drivers for Maine's economy. As an organization, Maine Lakes continues to mature and expand its relevancy to hundreds of members, advocates and volunteers committed to preserving our lake heritage for subsequent generations.
Lake Smart	lakesmart@lakes.me , or visit lakes.me/lakesmart	to address declining lake water quality due to urban/suburban landscaping and development by evaluating lakeside properties and giving LakeSmart Awards to homeowners whose property met certain water quality protection standards.
Well Data for Maine	https://www.maine.gov/dacf/mgs/pubs/digital/well.htm	Water Well Database. The Water Well Information Law, passed in 1987, requires the Maine Geological Survey to collect information on new water wells in Maine. This information is essential to any effort aimed at understanding Maine's ground water resources. In addition, the information is useful to communities considering new water supplies or in their planning efforts, to developers and businesses, to consultants investigating water supply or quality issues, to drillers, and to agricultural irrigators.
